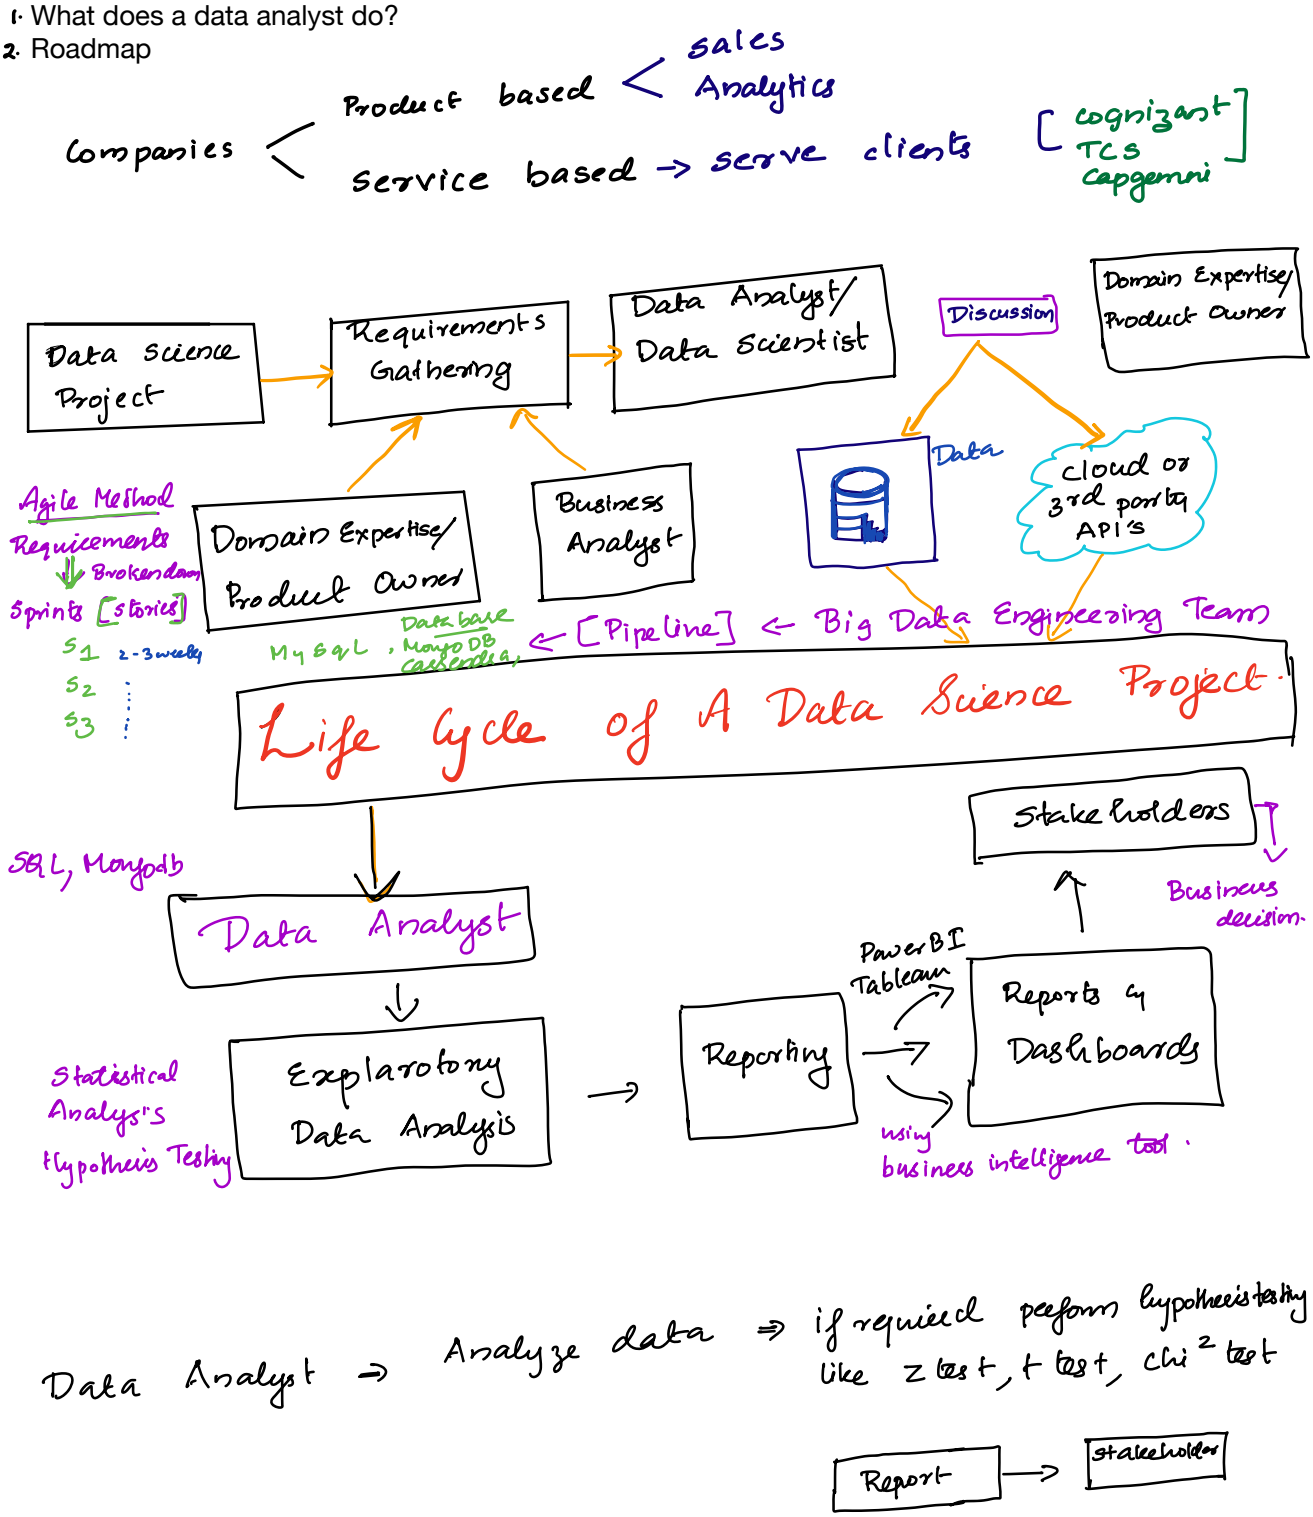
1. What does a data analyst do?
2. Roadmap



Data Analyst → Analyze data ⇒ if required perform hypothesis testing like z test, t test, chi^2 test

Report → stakeholder

Roadmap

1. Programming language → Python → Numpy, Pandas, Matplotlib, Seaborn, EDA, Feature Engineering
2. Statistics < Descriptive Statistics, Inferential Statistics
3. Feature Engineering
4. Exploratory Data Analysis
5. SQL Server → Basic to Advanced → Interview Questions
6. Power BI → Business Intelligence Tools → Reporting, DAX, Power Query Models

SQL server ⇓ Huge Dataset

Solve amazing end to end Projects
